Important information

Proper use

The machine is designed and intended for private domestic use. It should only be used for coffee preparation and to heat milk and water. Use for any other purpose will be deemed improper. JURA Elektroapparate AG cannot accept any responsibility for the consequences of improper use.

Before using the machine read these instructions for use thoroughly and completely and comply with the instructions they contain. A warranty service is not applicable for damage or defects caused by non-compliance with the instructions for use. Keep these instructions for use close to the machine and pass them on to the next user.

For your safety

Please carefully read and observe the important safety information set out below.

To avoid danger of potentially fatal electric shock:

- Never use a machine which is damaged or has a defective mains cable.
- In the event of signs of damage, for example if there is a smell of burning, unplug the machine immediately from the mains supply and contact JURA service.

- For models with a permanently connected mains cable: If the mains cable of this machine is damaged, it must be repaired either directly by JURA or by an authorised JURA service centre.

- For models with a disconnectable mains cable: If the mains cable of this machine is damaged it must be replaced with a special mains cable, which is available directly from JURA or from authorised JURA service centres.

- Make sure that the JURA and the mains cable are not located close to hot surfaces.

- Be careful to ensure that the mains cable is not trapped and does not rub against sharp edges.

- Never open and repair the machine yourself. Do not modify the machine in any way that is not described in these instructions for use. The machine contains live parts. If opened, there is a danger of potentially fatal injury. Repairs may only be carried out by authorised JURA service centres, using original spare parts and accessories.
To completely and safely disconnect the machine from the power supply, first switch off the JURA using the On/Off button. Only then should you remove the mains plug from the power socket.

There is a risk of scalds or burns on the spouts.

- Place the machine out of the reach of children.
- Do not touch any hot parts. Use the handles provided.

A defective machine is not safe and could cause injury or fire. To avoid damage and any associated risk of injury or fire:

- Never allow the mains cable to loosely hang down. The mains cable could pose a tripping hazard or become damaged.
- Protect the JURA from environmental influences such as rain, frost and direct sunlight.
- Do not immerse the JURA, mains cable or connections in water.
- Do not put the JURA or any individual parts in the dishwasher.
- Before cleaning, switch the JURA off with the On/Off button. Always wipe the JURA with a damp cloth rather than a wet one, and protect it from prolonged exposure to water splash.

Only connect the machine to the mains voltage in accordance with the information on the rating plate. The rating plate is located on the underside of your JURA. Further technical data is provided in these instructions for use (see Chapter 9 ‘Technical data’).

Connect the JURA directly to a domestic power socket. Using multi-socket adapters or extension cords may cause overheating.

Please only use original JURA maintenance products. Use of products that are not explicitly recommended by JURA could damage the machine.

- Do not use alkaline cleaning agents when cleaning, use a soft cloth and a mild detergent.
- Do not use any coffee beans treated with additives or caramelised coffee beans.
- Only fill the water tank with fresh, cold water.
- Switch the machine off with the On/Off button if you are going to be absent for a longer period of time and remove the mains plug from the power socket.
- Children may not clean or service the machine unless supervised by a responsible person.
Preparing and using for the first time

- Do not allow children to play with the machine.
- Keep children under the age of 8 away from the machine, or supervise them constantly.
- Children aged 8 and over may only operate the machine without supervision if they have been instructed in how to use it safely. Children must be able to recognise and understand the potential dangers arising from incorrect use.

People, including children, who
- do not have the physical, sensory or mental capabilities to use the machine safely or
- are inexperienced or lack knowledge in how to use the machine safely must be supervised by a responsible person when using it, or must be instructed in how to use it correctly.

Safety when handling the CLARIS Blue filter cartridge:
- Filter cartridges should be kept out of the reach of children.
- Store filter cartridges in a dry place in the sealed packaging.
- Protect cartridges from heat and direct sunlight.
- Do not use damaged filter cartridges.
- Do not open filter cartridges.

JURA on the Internet
Visit us on the Internet. On the JURA website (www.jura.com) you will find interesting and up-to-date information on your JURA and on every aspect of coffee.

3-colour plain text display
Your JURA features a 3-colour plain text display. The colours of the display texts have the following meanings:
- Green: The JURA is ready for use.
- Red: The JURA is prompting you to perform some action.
- Yellow: You are in programming mode.

Setting up the machine
When setting up your JURA, please note the following:
- Place the JURA on a horizontal surface that is not sensitive to water.
- Choose a spot for your JURA which protects the machine against overheating. Ensure that the ventilation slots are not covered.
Filling the bean container

CAUTION
Coffee beans which have been treated with additives (e.g. sugar), ground coffee or freeze-dried coffee will damage the grinder.

- Only use roasted, untreated coffee beans to fill the bean container.
- Remove the aroma preservation cover of the bean container.
- Remove any dirt or foreign objects from inside the bean container.
- Fill the bean container with coffee beans.
- Close the bean container.

First-time use

When using the machine for the first time, you can choose whether you want to operate JURA with or without the CLARIS Blue filter cartridge. If the water hardness is 10 °dH or more, we recommend using the filter cartridge. If you do not know the hardness of your water, you can find this out first (see Chapter 1 ‘Preparing and using for the first time – Determining the water hardness’).

WARNING
If the machine is operated with a defective mains cable, there is a danger of potentially fatal electric shock.

- Never use a machine which is damaged or has a defective mains cable.

Precondition: The bean container has been filled.

- Insert the mains plug into a power socket.
- Press the On/Off button ‡ to switch the machine on.

SPRACHE DEUTSCH

Turn the Rotary Switch until the required language is displayed, for example LANGUAGE ENGLISH.

- Press the Rotary Switch to confirm the language setting.
  OK, the language is now set.
  FILTER Y/YES Y

Now decide whether you want to operate your JURA with or without a CLARIS Blue filter cartridge.

First-time use with filter cartridge activation

- Press the Rotary Switch.
  OK
  INSERT FILTER
- Remove the water tank.
- Open the filter holder.
- Insert the filter cartridge into the water tank, exerting slight pressure.

After two months, the filter will cease to work. Set the date on the date plate on the filter holder in the water tank.
1 Preparing and using for the first time

- Fill the water tank with fresh, cold water and reinsert it.
- Place a receptacle (at least 500 ml) under the hot-water and dual spout.
- Press the Rotary Switch.

**FILTER RINSING**, water flows out of the hot-water spout.

ℹ️ You can interrupt rinsing of the filter at any time by pressing any button. Press the Rotary Switch to continue rinsing of the filter.

ℹ️ The water may be slightly discoloured. This is not harmful to health and does not affect the taste.

Rinsing of the filter stops automatically.

**SYSTEM FILLING**, the system fills up with water.

**HEATING**, ready

First-time use without filter cartridge activation

- Turn the Rotary Switch until **FILTER – / NO –** is displayed.
- Press the Rotary Switch.
  - OK
  - 16°dH
- Turn the Rotary Switch to change the water hardness setting, e.g. to 25°dH.
- Press the Rotary Switch.
  - OK
  - FILL WATER TANK

- Fill the water tank with fresh, cold water and reinsert it.
- Place a receptacle under the dual spout and the hot-water spout.
- Press the Rotary Switch.

**SYSTEM FILLING**, the system fills up with water.

**HEATING**, ready

Determining the water hardness

You can find out what the water hardness is by using the Aquadur® test strip supplied as standard.

- Hold the test strip briefly (for one second) under running water.
- Shake off the water.
- Wait for about one minute.
- You will then be able to read the degree of water hardness from the discolouration of
the Aquadur® test strip and the description on the packaging.

The water hardness can now be set.

Connecting milk

Your JURA creates fine, creamy, feather-light milk foam with a perfect consistency. The most important requirement for frothing milk is a milk temperature of 4–8 °C. We would therefore recommend using a milk cooler or a vacuum milk container.

- Remove the protective cover of the dual spout.
- Connect the milk pipe to the dual spout.
- Connect the other end of the milk pipe to a milk container or immerse it in a milk carton.

Ensure that the filling height of the milk is no higher than the milk pipe connection on the dual spout.

2 Preparation

You can interrupt preparation at any time while a speciality coffee, speciality coffee with milk or hot water is being prepared. Just press any button.

Before and during the grinding operation you can change the coffee strength of espresso 🍀, coffee ☕️, cappuccino ☕️️ and latte macchiato ☕️️️ by turning the Rotary Switch.

During preparation, you can change the preset amounts (e.g. amount of milk foam or water) by turning the Rotary Switch.

You can follow the current status of preparation on the progress bar.

Coffee tastes best served hot. A cold porcelain cup cools the beverage – and impairs the taste. We therefore recommend prewarming the cups. The full coffee aroma can develop only in prewarmed cups. You can purchase a JURA cup warmer from your specialised dealer.

You can make permanent settings for all products in programming mode (see Chapter 4 ‘Permanent settings in programming mode – Products’).

Espresso, coffee

Preparation of espresso 🍀 and coffee ☕️ follows this model.

Example: Proceed as follows to prepare one coffee.

Precondition: READY is displayed.

- Place a cup under the dual spout.
- Press the Coffee button to start preparation. COFFEE, the preset amount of water flows into the cup.
Preparation stops automatically.
READY
Two espressi and two coffees

The preparation of two espressi and two coffees follows this same model.

Example: Prepare two espressi.

Precondition: READY is displayed.

> Place two espresso cups under the dual spout.

Press the Espresso button twice (within two seconds) to start coffee preparation. READY appears and the preset amount of water flows into the cups.

i Please note that when two speciality coffees are prepared, the second is prepared immediately after the first.

Preparation stops automatically.

READY

Latte macchiato, cappuccino

Your JURA can prepare a latte macchiato or cappuccino at the touch of a button. There is no need to move the glass or cup.

Latte macchiato ☕️ and cappuccino ☕️ are prepared following this model.

Example: Proceed as follows to prepare one latte macchiato.

Precondition: READY is displayed. Milk is connected to the dual spout.

> Place a glass under the dual spout.

Press the Latte Macchiato button.

LATTE MAC 🍰, the milk foam is prepared. Preparation stops automatically when the preset amount of milk is reached.

PAUSE

i There is a short interval while the hot milk separates from the milk foam. This allows the typical layers of a latte macchiato to form. You can choose the length of this interval in programming mode (see Chapter 4 ‘Permanent settings in programming mode – Products’).

Ground coffee

You can choose to use a second coffee variety, for example decaffeinated coffee, with the powder chute for ground coffee.

i Never add more than one level measuring spoon of ground coffee.

i Use ground coffee which is not ground too finely. Very fine coffee can block up the system so that the coffee only comes out in drips.

i If you did not fill the machine with a sufficient amount of ground coffee, NOT ENOUGH POWDER is displayed and the JURA stops the operation.

i The desired speciality coffee must be prepared within approximately one minute after filling with the ground coffee. Otherwise the JURA stops the operation and is once more ready for use.

The preparation of coffee, espresso, cappuccino and latte macchiato with ground coffee follows this model.

Example: Prepare a cup of coffee using ground coffee.

Precondition: READY is displayed.
Place a cup under the dual spout.
Open the powder chute for ground coffee.
Place the filler funnel for ground coffee on the powder chute.

Place one level measuring spoon of ground coffee into the filler funnel.
Close the powder chute for ground coffee.

Select button
Press the Coffee button to start preparation.

COFFEE, the preset amount of water flows into the cup.
Preparation stops automatically.

Ready
Permanently setting the amount of water for the cup size

It is easy to make permanent settings for the amount of water for all speciality coffees and hot water according to the cup size. Adjust the amount once as shown in the following example. Every time you prepare a drink in the future, this amount will be dispensed.

Example: Permanently adjust the amount of cappuccino to the cup size.
Precondition: READY is displayed. Milk is connected to the dual spout.
Press and hold the Cappuccino button until ENOUGH MILK? appears.
Release the Cappuccino button.
The milk foam is prepared.
Press any button as soon as there is sufficient milk foam in the cup.
OK
ENOUGH COFFEE?, the coffee flows into the cup.
Press any button as soon as there is sufficient coffee in the cup.
OK, CAPPuccino, the set amounts for one cappuccino are permanently stored.
READY

You can alter this setting at any time by repeating the above procedure.

Adjusting the grinder

You can adjust the grinder on a continuous scale to suit the degree of roast of your coffee.

CAUTION
If you adjust the consistency of grind when the grinder is not operating, the grinder adjustment switch could be damaged.
Only adjust the consistency of grind when the grinder is running.

The consistency of grind is correct if the coffee flows regularly from the dual spout. In addition a fine, thick crema forms.

Example: Change the consistency of grind during the preparation of an espresso.
Place a cup under the dual spout.
Open the cover for grinder adjustment switch.

Press the Espresso button to start preparation.
Turn the grinder adjustment switch to the desired position while the grinder is running.
Daily operation

Filling the water tank

Daily maintenance of the machine and hygiene when handling milk, coffee and water are key to a perfect coffee result in the cup every time. You should therefore change the water daily.

CAUTION
Milk, sparkling mineral water or other liquids can damage the water tank or the machine.
- Only fill the water tank with fresh, cold water.
- Remove the water tank and rinse with cold water.

Switching on the machine

- Place a receptacle under the dual spout.
- Press the On/Off button to switch the machine on.
- The system rinses itself. The operation stops automatically.

Daily maintenance

To ensure that you get many years of reliable service out of your JURA and to guarantee the optimum coffee quality, the machine requires daily maintenance.
- Remove the drip tray.
- Empty the coffee grounds container and drip tray and rinse with warm water.
- Always empty the coffee grounds container when the machine is switched on. This is the only way of resetting the coffee grounds counter.
- Reinsert the coffee grounds container and the drip tray.
- Rinse the water tank with clean water.
- Dismantle and rinse the dual spout (see Chapter 5 ‘Maintenance – Dismantling and rinsing the dual spout’).
- Wipe the surface of the machine with a clean, soft, damp cloth (e.g. microfibre cloth).

Regular maintenance

Carry out the following maintenance actions regularly or as required:
- In the interests of hygiene, we recommend changing the milk pipe on a regular basis (approximately every 3 months). Replacement pipes are available from specialised dealers (JURA original accessory set for milk systems).
Clean the inside of the water tank, e.g. with a brush. Further information about the water tank is provided in these instructions for use (see Chapter 5 ‘Maintenance – Descaling the water tank').

Traces of milk and coffee may stick to the top and bottom of the cup grille. If this happens, clean the cup grille.

Switching off the machine

When the JURA is switched off, the system is automatically rinsed if a speciality coffee has been prepared. If milk has been prepared, you will also be prompted to clean the milk system.

Precondition: READY is displayed.

- Place a receptacle under the dual spout.
- Press the On/Off button to switch the machine off.

If milk has been prepared, you will be prompted to clean the milk system (M–CLEAN / START ?). After 10 seconds the switch-off process continues automatically.

RINSING, the system rinses itself. The operation stops automatically. Your JURA is switched off.

4 Permanent settings in programming mode

Products

You can make the following permanent settings:

- **Espresso**
  - Amount of water: **15 ML – 80 ML**
  - Coffee strength: 10 levels
  - Temperature: NORMAL, HIGH

- **Coffee**
  - Amount of water: **25 ML – 240 ML**
  - Coffee strength: 10 levels
  - Temperature: NORMAL, HIGH

- **Latte macchiato and cappuccino**
  - Amount of milk foam: **3 SEC – 120 SEC**
  - Interval: **0 SEC – 60 SEC**
  - Coffee strength: 10 levels
  - Amount of water: **25 ML – 240 ML**
  - Temperature: NORMAL, HIGH

- **Milk foam**
  - Amount of milk foam: **3 SEC – 120 SEC**

- **Hot water**
  - Amount of water: **25 ML – 450 ML**

Permanent settings in programming mode always follow the same model.

**Example:** Permanently change the coffee strength (FLAVOUR) of an espresso.

Precondition: READY is displayed.

- Press and hold the Rotary Switch until **RINSE** appears.
- Turn the Rotary Switch until **PRODUCT** is displayed.
- Press the Rotary Switch to enter the programme item.

**SELECT BUTTON**

- Next select the button of the product for which you would like to make settings. No product is prepared at this point.

- Press the Espresso button.

**ESPRESSO**

**WATER**

- Turn the Rotary Switch until **FLAVOUR** is displayed.
- Press the Rotary Switch to enter the programme item.

**EXAMPLE**

- Turn the Rotary Switch to change the setting.
- Press the Rotary Switch to confirm the setting.

OK, the coffee strength is now set.

**FLAVOUR**

- Turn the Rotary Switch until **EXIT** is displayed.
Permanent settings in programming mode

- Press the Rotary Switch to exit the programme item.
- Turn the Rotary Switch until EXIT is displayed.
- Press the Rotary Switch to exit programming mode.

PRODUCT

### Setting the water hardness

- If you are using the CLARIS Blue filter cartridge and have activated it in programming mode, you will not be able to adjust the water hardness.

The harder the water is, the more frequently the JURA needs to be descaled. It is therefore important to set the water hardness accurately.

The water hardness can be adjusted on a continuous scale between 1 °dH and 30 °dH.

**Precondition:** READY is displayed.
- Press and hold the Rotary Switch until RINSE appears.
- Turn the Rotary Switch until HARDNESS is displayed.
- Press the Rotary Switch to enter the programme item.
  - 16 °dH (Example)
- Turn the Rotary Switch to change the setting.
- Press the Rotary Switch to confirm the setting.
  - OK, the water hardness is now set.

### Automatic switch-off

By instructing your JURA to automatically switch itself off, you can cut down your energy consumption. If this function is activated, your JURA switches off automatically after the preset time following the last action on the machine.

The automatic switch-off can be set to between 15 minutes and 9 hours.

**Precondition:** READY is displayed.
- Press and hold the Rotary Switch until RINSE appears.
- Turn the Rotary Switch until OFF AFTER is displayed.
- Press the Rotary Switch to enter the programme item.
  - 2 HRS (Example)
- Turn the Rotary Switch to change the setting.
- Press the Rotary Switch to confirm the setting.
  - OK, the switch-off time is now set.

### Unit for amount of water

You can change the unit for the amount of water from ‘ml’ to ‘oz’.

**Precondition:** READY is displayed.
- Press and hold the Rotary Switch until RINSE appears.
- Turn the Rotary Switch until DISPLAY is displayed.
- Press the Rotary Switch to enter the programme item.
  - ML (Example)
- Turn the Rotary Switch to change the setting.
5 Maintenance

Your JURA has the following integrated maintenance programmes:

- Rinsing the machine (RINSE)
- Rinsing the milk system in the dual spout (M-RINSE)
- Cleaning the milk system in the dual spout (M-CLEAN)
- Changing the filter (FILTER) (only if filter is activated)
- Cleaning the machine (CLEAN)
- Descaling the machine (DE-SCALE)

Language

In this programme item you can set the language used by your JURA.

Example: Change the language from ENGLISH to DEUTSCH.

Precondition: READY is displayed.

- Press and hold the Rotary Switch until RINSE appears.
- Turn the Rotary Switch until LANGUAGE is displayed.
- Press the Rotary Switch to enter the programme item.
  ENGLISH
- Turn the Rotary Switch until DEUTSCH is displayed.
- Press the Rotary Switch to confirm the setting.
  OK, the language is now set.
  SPRACHE
- Turn the Rotary Switch until EXIT is displayed.
- Press the Rotary Switch to exit programming mode.
  BEREIT

Rinsing the machine

Precondition: READY is displayed.

- Place a receptacle under the dual spout.
5 Maintenance

Rinsing the milk system

After each milk preparation, the JURA prompts you to perform a milk system rinse.

Precondition: READY / M-RINSE is displayed.
- Place a receptacle under the dual spout.
- Press the Rotary Switch to start milk system rinsing.
  RINSING, the milk system is rinsed.
  The rinse stops automatically. READY appears on the display.

Cleaning the milk system

To ensure that the milk system in the dual spout always works properly, you must clean it daily when you have been preparing milk.

CAUTION
If the wrong cleaning agent is used, the machine could be damaged and/or traces could be left behind in the milk.
- Use only original JURA maintenance products.

JURA milk system cleaner is available from specialised dealers.

To connect the milk pipe to the container correctly, the pipe must be fitted with a connector.
- Press the Rotary Switch.
  CLEANING, the milk system and the pipe are cleaned.
  The operation is interrupted, WATER FOR M-CLEAN.
- Rinse the container thoroughly and fill the front part with 250 ml fresh water.
- Place the container under the dual spout and connect the milk pipe with the container again.

Press the Rotary Switch to start milk system cleaning.
AGENT FOR M-CLEAN
- Remove the milk pipe from the milk container or carton.
- Add milk system cleaner to the front part of the container up to the bottom mark (indicated by 6).
- Then add water up to the top mark.
- Place the container under the dual spout.
- Connect the milk pipe to the container.

Press and hold the Rotary Switch until RINSE appears.
Press the Rotary Switch to enter the programme item.
M-CLEAN

Place a receptacle under the dual spout.
Press the Rotary Switch to start milk system rinsing.
RINSING, the milk system is rinsed. The rinse stops automatically. READY appears on the display.

Place the container under the dual spout and connect the milk pipe with the container again.

JURA milk system cleaner is available from specialised dealers.
To clean the milk system, use the container supplied.

Press the Rotary Switch until RINSE appears.
Press the Rotary Switch to enter the programme item.
M-CLEAN

To connect the milk pipe to the container correctly, the pipe must be fitted with a connector.
Press the Rotary Switch.
CLEANING, the milk system and the pipe are cleaned.
The operation is interrupted, WATER FOR M-CLEAN.
Rinse the container thoroughly and fill the front part with 250 ml fresh water.
Place the container under the dual spout and connect the milk pipe with the container again.
Press the Rotary Switch.  
CLEANING, the milk system and the pipe are rinsed with fresh water.  
The operation stops automatically.  
READY

Dismantling and rinsing the dual spout

The dual spout must be dismantled and rinsed daily if milk has been prepared to make sure it functions perfectly and also in the interests of hygiene.

- Remove the milk pipe and rinse thoroughly under running water.
- Press the releasing devices and pull the dual spout down and off.

- Push the milk system down and remove it.

- Dismantle the milk system into its individual parts.

- Rinse all parts under running water. If a lot of milk residue has dried on, first soak the individual parts in a solution of 250 ml of cold water and 1 capful of JURA milk system cleaner and then rinse thoroughly.
- Fit the air intake pipe.

- Reassemble the milk system, noting the numbering on the parts.

- Insert the assembled individual parts into the dual spout and press them together. They will click into place audibly.
- Fit the dual spout on the machine. It will click into place audibly.
Inserting and activating the filter

Your JURA no longer has to be descaled if you are using the CLARIS Blue filter cartridge. If you did not activate the filter cartridge the first time you used the machine, you can do this now as follows.

- Perform the ‘inserting the filter’ operation without any interruptions. This will ensure that your JURA always produces its best.

**Precondition:** READY is displayed.

- Press and hold the Rotary Switch until RINSE appears.
- Turn the Rotary Switch until FILTER -- is displayed.
- Press the Rotary Switch to enter the programme item.
- NO --
- Turn the Rotary Switch until YES ✓ is displayed.
- Press the Rotary Switch to confirm the setting.
- OK
- INSERT FILTER
- Remove and empty the water tank.
- Open the filter holder.
- Insert the filter cartridge into the water tank, exerting slight pressure.
- Close the filter holder. It will click into place audibly.

After two months, the filter will cease to work. Set the date on the date plate on the filter holder in the water tank.

- Place a receptacle (at least 500 ml) under the hot-water spout.

- Press the Rotary Switch.
  FILTER RINSING, water flows out of the hot-water spout.

- You can interrupt rinsing of the filter at any time by pressing any button. Press the Rotary Switch to continue rinsing of the filter.

- The water may be slightly discoloured. This is not harmful to health and does not affect the taste.

Rinsing of the filter stops automatically.

HEATING
READY
The filter is now activated.

Changing the filter

- After 50 litres of water have flowed through, the filter will cease to work. Your JURA will automatically prompt you to change the filter.

- After two months, the filter will cease to work. Set the date on the date plate on the filter holder in the water tank.

- If the CLARIS Blue filter cartridge is not activated in programming mode, you will not be prompted to change the filter.

**Precondition:** FILTER / READY is displayed.

- Press the Rotary Switch.
  INSERT FILTER
- Remove and empty the water tank.
Open the filter holder and remove the old filter cartridge.
Insert a new filter cartridge into the water tank, exerting slight pressure.
Close the filter holder. It will click into place audibly.
Fill the water tank with fresh, cold water and reinsert it.
Place a receptacle (at least 500 ml) under the hot-water spout.

Press the Rotary Switch. FILTER RINSING, water flows out of the hot-water spout.
You can interrupt rinsing of the filter at any time by pressing any button. Press the Rotary Switch to continue rinsing of the filter.
The water may be slightly discoloured. This is not harmful to health and does not affect the taste.
Rinsing of the filter stops automatically. HEATING READY

Cleaning the machine
After 180 preparations or 80 switch-on rinses, the JURA will prompt you to clean it.

CAUTION
If the wrong cleaning agent is used, the machine could be damaged and/or traces could be left behind in the water.

Use only original JURA maintenance products.

The cleaning programme lasts approximately 15 minutes.
Do not interrupt the cleaning programme. The quality of cleaning will be impaired if you do so.
JURA cleaning tablets are available from specialised dealers.

Precondition: CLEAN/READY is displayed.
Press the Rotary Switch. EMPTY TRAY
Empty the drip tray and coffee grounds container and reinsert them. PRESS ROTARY
Place a receptacle under the dual spout.

 Press the Rotary Switch. CLEANING, water flows out of the dual spout.
The operation is interrupted, ADD TABLET.
Open the powder chute for ground coffee and drop in a JURA cleaning tablet.

Close the powder chute for ground coffee.

Press the Rotary Switch.

Cleaning, water flows out of the dual spout repeatedly.

Empty the drip tray and coffee grounds container and reinsert them.

Descaling the machine

The JURA builds up deposits of limescale over time and automatically prompts you to descale it when necessary. The degree of calcification depends on the hardness of your water.

If you use a CLARIS Blue filter cartridge and this is activated, you will not be prompted to descale.

CAUTION
If the descaling agent comes into contact with the skin or eyes, this can cause irritation.

- Avoid contact with the skin or eyes.
- Rinse off the descaling agent with clean water. Should you get any descaling agent in your eye, see a doctor.

CAUTION
If the wrong descaling agent is used, the machine could be damaged and/or traces could be left behind in the water.

- Use only original JURA maintenance products.

Precondition: DE-SCALE / READY is displayed.

If the descaling operation is interrupted, there may be damage to the machine.

- Allow the descaling programme to run to the end.

CAUTION
If the descaling agent comes into contact with sensitive surfaces (e.g. marble), damage cannot be ruled out.

- Clean up any splashes immediately.

- The descaling programme lasts approximately 40 minutes.
- JURA descaling tablets are available from specialised dealers.

The descaling programme lasts approximately 40 minutes.

JURA descaling tablets are available from specialised dealers.

Precondition: DE-SCALE / READY is displayed.

- Press the Rotary Switch.
- Empty the drip tray and coffee grounds container and reinsert them.
- Remove and empty the water tank.
- Completely dissolve the contents of one blister (three JURA descaling tablets) in a receptacle holding 500 ml of water. This may take several minutes.

- Pour the solution into the empty water tank and reinsert the tank.

Press Rotary
Place a receptacle under the hot-water spout.

Press the Rotary Switch.

DE-SCALING, water flows out of the hot-water spout repeatedly.

EMPTY TRAY

Empty the drip tray and coffee grounds container and reinsert them.

FILL WATER TANK

Empty the receptacle and place it under the dual and hot-water spout.

Remove the water tank, rinse thoroughly, fill with fresh, cold water and reinsert.

PRESS ROTARY

Press the Rotary Switch.

DE-SCALING, water flows out of the dual and hot-water spout.

The operation is interrupted, EMPTY TRAY.

Empty the drip tray and coffee grounds container and reinsert them.

READY

If the descaling operation stops unexpectedly, rinse the water tank thoroughly.

Descaling the water tank

Limescale deposits may form in the water tank. To ensure correct function of the machine, descale the water tank from time to time.

Remove the water tank.

If you use a CLARIS Blue filter cartridge, remove it.

Completely fill the water tank and dissolve 3 JURA descaling tablets in it.

Leave the water tank with the descaling solution for several hours (e.g. overnight).

Empty the water tank and rinse thoroughly.

If you use a CLARIS Blue filter cartridge, reinsert it.

Fill the water tank with fresh, cold water and reinsert it.

Cleaning the bean container

Coffee beans may be covered with a slight oil film which remains on the walls of the bean container. These traces may negatively affect the coffee result. For this reason clean the bean container from time to time.

Press the On/Off button to switch the machine off.

Disconnect the mains plug.

Remove the bean container cover.

Remove the coffee beans with a vacuum cleaner.

Clean the bean container with a soft, dry cloth.

Fill the bean container with fresh coffee beans, then close the bean container cover.

| Insufficient foam is produced when the milk is frothed, or milk sprays from the dual spout. | The dual spout is dirty.                                                     | ▶ Clean the dual spout (see Chapter 5 ‘Maintenance – Cleaning the milk system’).  
  ▶ Dismantle and rinse the dual spout. (see Chapter 5 ‘Maintenance – Dismantling and rinsing the dual spout’). |
| Coffee only comes out in drips when it is being prepared.               | Coffee or ground coffee has been ground too finely and is blocking the system. | ▶ Set the grinder to a coarser setting or use coarser ground coffee (see Chapter 2 ‘Preparation – Adjusting the grinder’). |
| Water hardness cannot be adjusted.                                     | The CLARIS Blue filter cartridge is activated.                               | ▶ Deactivate the CLARIS Blue filter cartridge in programming mode.                                                                    |
| FILL WATER TANK is displayed although the water tank is full.          | The water tank float is trapped.                                             | ▶ Descale the water tank (see Chapter 5 ‘Maintenance – Descaling the water tank’).                                                    |
| Grinder is making a very loud noise.                                   | There are foreign objects in the grinder.                                    | ▶ Contact customer support in your country (see Chapter 11 ‘JURA contact details / Legal information’).                              |
| ERROR 2 is displayed.                                                  | If the machine has been exposed to the cold for a long period of time, heating may be disabled for safety reasons. | ▶ Warm the machine at room temperature.                                                                                               |
| Other ERROR messages are displayed.                                   |                                                                               | ▶ Switch off the JURA with the On/Off button.  
  ▶ Contact customer support in your country (see Chapter 11 ‘JURA contact details / Legal information’). |

If you were unable to solve the problem, contact customer support in your country (see Chapter 11 ‘JURA contact details / Legal information’).
8 Transport and environmentally friendly disposal

### Transport / Emptying the system

Keep the packaging for your JURA. It should be used to protect the machine during transport.

In order to protect the JURA from frost during transport, the system must be emptied.

**Precondition:** `READY` is displayed.

- Place a receptacle under the hot-water spout.

![Image](image.png)

- Press the Hot Water button.
  - WATER, hot water flows out of the hot-water spout.
- Remove and empty the water tank.
  - Hot water will continue to flow until the system is empty.
  - **FILL WATER TANK**

- Press the On/Off button to switch the machine off.

### Disposal

Please dispose of old machines in an environmentally neutral way.

Old machines contain valuable, recyclable materials which should be recycled. Please therefore dispose of old machines via suitable collection systems.
